CETETHERM PIONEER

Heat Interface Unit for
Family Homes and Apartments

CETETHERM PIONEER

Fourth generation Heat Interface Unit for Family Homes and Apartments

Climate smart - Energy Efficiency - High comfort

Cetetherm Pioneer is a Heat Interface Unit for heating and domestic hot water which suits family homes and apartments. In addition to a stylish design and a compact format that makes it easy to place and install, you can expect these benefits:

- ✓ Supply temperature of 55-65°, which means Pioneer is compatible with other energy sources as heat pumps. The possibility of using low supply temperatures results in very low energy losses and is also an optimal temperature for, for example, a secondary network
- ✓ The market's best domestic hot water control with built-in-energy-optimized idle function
- ✓ The BESA test shows the market's lowest return temperature
- ✓ Energy efficiency that provides low costs - both during operation and consumption
- ✓ User friendly room panel with real time operating data. Controller included as standard
- ✓ App for smartphones/computer for remote control, optimization and monitoring
- ✓ Heat pump ready
- ✓ High comfort and pleasant climate
- ✓ Minimal maintenance and long lifespan prepared for serviceability
- ✓ Pre-pay ready
- ✓ Low climate impact

Cetetherm Pioneer comes in a compact and stylish design.

Cetetherm Pioneer has been tested and is a BESA and UKReg4 registered product.

Remote energy optimization

Cetetherm myUplink

Control the heat in your home with an app for an easier everyday life

Cetetherm myUplink app is a free service that provides a quick overview of the Heat Interface Unit's status for home heating.

The solution has a customizable panel and is also compatible with Google Home, making it easy to monitor and control the heat and water production in your home, regardless where you are.

For an easier everyday life

Cetetherm myUplink Pro

Energy optimizes the customer's facilities - where you want, when you want

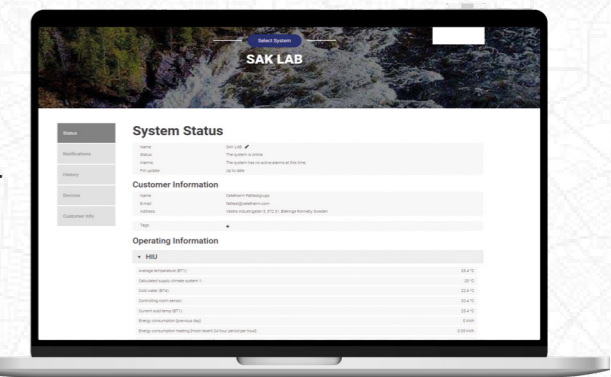

Cetetherm myUplink Pro is a service developed for energy suppliers, property owners and service companies, which provides great opportunities for high comfort for customers.

With myUplink Pro, you get a subscription that gives you additional information and history than in the basic subscription.

Once the customers are connected, you can remotely optimize heating and hot water temperature. You also get access to all menus, e.g alarm management, history, certain types of troubleshooting and installation settings.

In the event of any operational disruptions, you will be notified directly with a push notification on your mobile and via e-mail.

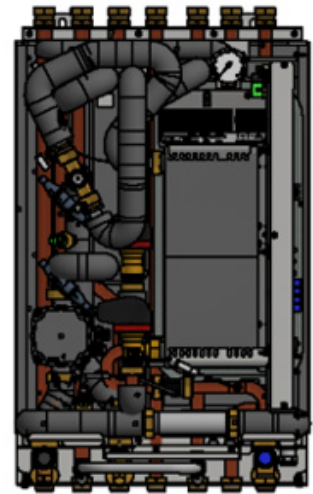

Give your customers a safe and high level comfort

Cetetherm Pioneer - Prepared for controlability and serviceability

User friendly control panel with real time operating data. Controller including as standard.

Cetetherm

Heating a new generation

Cetetherm is part of the NIBE Group, and for nearly 70 years has been a leading manufacturer of sustainable, energy efficient and hightech solutions for district heating and district cooling for apartments, family homes, commercial and industrial premises.

This is thanks to our approach to innovation, quality and energy efficiency.

We offer comprehensive, smart and connected solutions to customers looking for energy efficiency, sustainability and cost effectiveness. We combine leading Swedish knowledge with the latest technology in Artificial Intelligence (AI) to reduce energy costs and climate impact.
